

# MODEL 300 APPLICATIONS

## Age Verification

### Scan Technology

“STI” is adapting its PC-Based Age Verification/Tracking Program, utilized with E-Seek M250, for the M300. The cardholder’s Birth Date and Age flashes on M300 Display. Captured data from State Drivers’ Licenses is stored in a Database file, and later written to an Excel spreadsheet on your desktop PC.

## Age Verification

### Legal Age Software

Ultimate in Age verification using different platforms to support our parsing and application software; Providing merchants more of a selection by offering them DLL and Application solutions for multiple application terminals for utilization with the E-Seek Model 200. The Windows based PC version for use with the E-Seek 250, E-Seek 300 and LamPC make a perfect match the Nightclub industry.

## Age Verification Restaurant & Bar

### IDETECT

IDetect is the most intuitive scanning system on the market. Easy to use, automatic picture taking of Entrant and their license, VIP Card creation, automatic Custom Wristband printing, and complete management/marketing tools built in, IDetect has set the standard for ID scanning once again. Law enforcement and ABC/LCB endorsed. Use with M300, M250, and M200.
